

Sea Maid Instructions

1. Pour mixture into internal mixing cup. Fill to max line and secure cap.
 2. Fill external chamber of Sea Maid with as much ice as possible and ½ cup of rock salt.
 3. Tightly secure lids using provided wrench.
 4. Attach Sea Maid to your line, (15'-20' is recommended) lower it over the side of the vessel into the water, and put boat in forward motion.
 5. In 10 minutes recover Sea Maid and stir ingredients. Return to the water for 15 additional minutes.
 6. Recover again and enjoy fresh ice-cream. For more ice-cream repeat process.
 7. Clean and store in cool dry place when not in use.
- *make sure ice cream maker has dried completely.
